

# Carlos Aguirre Oseguera

FRONT-END DEVELOPER | MEXICO | FEB.27.1986

email@ca2los.com | linkedin.com/in/carlos-aguirre-oseguera | github.com/ca2los

UX DESIGNER

AWS CLOUD MANAGER

FRAMEWORK DESIGNER

## 1 ABOUT:

I consider myself as an enthusiast for technology and web development. My desire to stay updated allows me to challenge myself and try the things that interest me the most. Since the beginning as a front-end professional, I have improved my transition into languages like Javascript, its libraries, and frameworks. In spite of the fact that I feel comfortable with my actual activities, I seek to be part of a team to explore and learn back-end. **I'm willing to start a new journey!**

## 2 CORE SKILLS:

Challenge seeker

Perseverant

Strong minded

Love of learning

## 3 PROFESSIONAL EXPERIENCE:

### Front-End @ Editorial Televisa

Ago. 2013 - PRESENT (+9 years)

My collaboration with Televisa has been evolving since the first year I joined the team. I started designing the front-end for webpages like Cosmopolitan, Esquire, Harper's Bazaar, Muy Interesante, National Geographic, and Vanidades. However in the last four years I had the chance to explore back-end, and to learn and administrate our cloud services in AWS, aswell as the servers configurations.

### Web Designer @ Flock (Linked by Isobar)

Ago. 2011 - Ago. 2013

My collaboration focused on developing and creating the assests, wireframes and production designs for Domino's Pizza Mexico websites and apps. I also worked in the creation and customization of e-stores, apps, and websites for Aeroméxico, Nescafé, Sprite, Powerade and other brands.

## 4 EDUCATION:

### Tecnológico de Monterrey: Bootcamp, Coding

2021

The coding bootcamp was an intensive, non-stop learning experience of auto exploration to get used with the technologies and knowledge required for full stack developers. It gave me the push that my curiosity needed on JavaScript, its frameworks, and libraries. With this experience I feel confident to move forward into a new challenge.

### Universidad del Pedregal: Graphic Design

2007 - 2011

I'm a former graphic designer who always felt passion for web development, even when I didn't knew it would be possible for someone like me. That said, my career focused on print deliveries, but I decided to shift my destiny into web development.

## 5 INTERESTS:

Mountain biking

Scripting

Bouldering & Hiking

Audio Preserving

## 6 TECHNOLOGIES:

HTML/CSS

JavaScript

Linux

Mongo DB

GIT

AWS

Heroku

NodeJS

NPM

Express
